

**Subject:** Letter of recommendation and acknowledgement

To the staff at NDEA,

Smalls Power Poles & Linework have been using NDEA for most of our non-destructive excavation works, there have been times when NDEA are not available unfortunately leaves us no choice but to use other non-destructive excavation companies.

However it gives me pleasure in recommending NDEA as our first choice for any non-destructive excavation works to any body in the need of this type of service.

Smalls recently had a job at Reservoir rd Blacktown, The job consist of night works excavating across Reservoir rd with our excavator. We had a few obstacles to over come which we got NDEA involved, Non-destructive excavation had to be carried out around Transmission and pilot cables, gas lines and Telstra lines which made the job that much easier having NDEA on site Brendan Mackay your employee is a true asset to your company.

Smalls personnel on site said he was such a great worker, by the efforts Brendan put forth allowed us to complete the job on time keeping us on schedule with our client.

Thank you again for the service NDEA offer.

Kind Regards

**Brad Smallacombe**
